we simplify safety

MOSAIC MSC

MOSAIC MSC enables communication between the various modules via its own 5-way high-speed bus. The modular MOSAIC MSC connectors can be used to connect the various expansion modules to MOSAIC M1. The connectors are located on the back of each module and are housed in the rail guide of the control cabinet. The main module MOSAIC M1 does not include the MOSAIC MSC connector. To connect the MOSAIC M1 to the first expansion module, you always have to order a MOSAIC MSC connector separately. In each additional expansion module, however, an MOSAIC MSC is included.

Environmental conditions

Max. storage temperature	-20 ... +85 °C
Max. operating temperature	-10 ... +55 °C
